#EMPLOYABILITY MATTERS

OUR GROUPS

If you are adopted, living in kinship care and/or living with FASD, our bespoke project could be for you!

Our project is facilitated through the following age groups:

- Under 9's
- 10 - 13
- 14 - 17
- 18+

However, we work on a stage rather age perspective. So that our young people can select which group they feel most comfortable with, ensuring they are in the correct group to engage and develop.

OUR AIMS

Our monthly online sessions aim to develop individual skills, social interactions, confidence and self-esteem. Along with additional in-person opportunities, experiences and competitions.

Activities range from arts and crafts, photography, designing, creative media, animations, magazine editing, film making and much more.

Fostering a sense of belonging, expanding peer support networks and gaining lifelong transferrable skills - tailored to age-specific transitions.

THEIR FUTURE

Alongside activity sessions, individuals will cover age specific health and wellbeing topics preparing them for adulthood.

They will also have the opportunity to participate in the creation and running of our youth advisory board. Learning transferrable skills for school, college, university, and the world of work.

Individuals will also have access to our #Employability Matters Service, enhancing their employability and exploring future career goals.
